Introduction

Pharmaland Technologies Ltd, is a Canada company that was found in 2005 in Toronto with a vision to offer affordable quality pharmaceutical and nutraceutical equipments and technical supports to our customers in Pharmaceutical, nutraceutical and food industries. With a global source of technologies and partnerships with those strategic manufacturers mainly in China, Pharmaland offers those most competitive products of the latest technologies with the world leading brand value.

We have our technical support team both in Toronto and Shenzhen China. We have our workshop, showroom and training center as well as parts inventory warehouse in China to provide our prompt service to global customer need.

About Pharmaland

Pharmaland technologies' machines are designed and developed with concepts and standards of Canadian mechanical quality and safety, and built up from our facilities of jointed venture and strategic partnership globally, mainly from those leading pharmaceutical machinery manufacturers in China to offer solid, dependable, affordable and built-in for last and long durations of production and package need.

Our mission is to offer pharmaceutical manufacturing and packaging machinery with advanced technologies at an affordable price, reliable technical supports.

Today, Pharmaland machines are widely used by many customers in the pharmaceutical, nutraceutical, and vitamin supplement industries worldwide.

*Innovative Pharmaceutical Machinery and
Technologies from Canada*

Our commitments and dedications include:

- > Guaranteed great savings and more cost-effective value
- > Reliable technical support and service (on-site set-up and prompt supports)
- > Show-room and operation training center in Toronto (Markham), Canada
- > Warranty and parts discount
- > GMP-compliant support
- > Turn-key solution and pilot plant project
- > Canadian brand and safety standards

Turn-key Solution:

Startup to Expanding & In-house Pilot Plant for Training

High Speed softgel Encapsulation Machine PSG-250III

Technical Parameters:

Die Roller Speed: Max. 8Rpm
Die Roller Size: Dia. 150 x W 250mm
Production Capacity: 8# OV 230,880 pcs/hour
Plunger Quantity: 20plunger
Filling Volume: 0-2ml
Precision of Filling: +/- 1%
Power Consumption: 5.1Kw; 380V/60Hz, 3 phases
Weight: 1500Kg
Dimension: L2200X W1000X H2100mm

Technical Parameters:

Steady machine speed: 30~100cartons/min
Unfold leaflet grammage range: Between(60-70)g/m
Unfold leaflet size range: (80-250) (90-170)mm (L W)
Unfold leaflet fold range: (1-4)fold, the leaflet can be folded by the machine
Carton grammage range: Between (250-350)g/m
Carton size range: (70-180) (35-85) (14-50)mm (L W H)
Standard power supply: 1phase, 220V, 50Hz
Power consumption: 0.75KW
Air consumption: 120-160L/min
Compressed Air Pressure: 0.6MPa
Noise: <70dB
Weight: 1500kg
Dimension: 3160mm 1200mm 1700mm (L W H)

Automatic Carton Packing Machine PPL-100C

All models come with the following standard features:

- > Fully-enclosed segments, capsule alignment station, and turning parts to prevent cross-contamination
- > All parts are built with high-quality stainless steel, and adopt quality brand-name electronic components
- > Equipped with safety switch on doors for shut-off and emergency stop button
- > The machines may be dosed and filled with powders (granular and pellet), and used for vegetable capsules and hard two-piece gelatine capsules
- > High capsule acceptability (up to 99.5%) and high dosing precision
- > Sensors to indicate low powder and capsule supplies
- > Low-loss dosing of powders, low noise
- > Used for capsule sizes from #00 - #5

Capsule Filling Machines (PCF Series)

Pharmaland Technologies' PCF-Series Automatic Capsule Filling Machines are equipped with the latest technologies of encapsulation and have an optimized structure for operation, monitoring, and trouble-shooting.

Tablet Press Machine (PTP Series)

Our PTP-Series Tablet Press Machines are capable of various production capabilities to exactly match your needs.

All of our Tablet Press Machines come fully-equipped with the following standard features:

- > Machine built with stainless parts and industrially-recognized branded electronic and main components
- > Touch-screen (PLC) control and trouble-shooting
- > Single or double force – feeding system
- > Faulty tablet rejection system
- > Central lubrication system
- > Safety protection system
- > B-type or D-type tooling
- > Pre-press wheels

Outsourcing Your Contract Development and Manufacturing

For nutraceutical products and facilities for better value and confidence.

Packaging Machine Line

Pharmaland Technologies offers a comprehensive packing line, with functions from cartoning and bagging, to counting and unscrambling pills.

Cartoning Machine PPL-120C

Cartoning Machine PPL-220C

Blister Machine PPL-250B

ALU ALU Packer PPL-350A

Bag Packer PPL-900B

Unscrambler PPL-700U/PPL-800U

Counting Machine PPL-80/16C and PPL-80/32C

Round Counting Machine YP-60C/YP-100C

Paper Packer PPL-60P

Cotton Packer PPL-60N

Dessicant Packer PPL-60D

Screw-Capping Machine PPL-100S

Induction Seal Machine PPL-1500I

Labelling Machine PPL-100L

You Have The Choice
We Have The Solution

Auxiliary

Apart from offering machines for a plethora of production needs, Pharmaland Technologies also offers auxiliary equipment designed to work together with our machine models to produce a seamless user experience. Our auxiliary equipment can also function independently and can be used in conjunction with other machines models as well. Their flexibility makes them well-suited to any production setup, and can be used to increase the effectiveness and speed of production.

- Tablet Deduster PAD-200B
- Industrial Dust Collector PAD-59
- Vacuum Loading Machine PAV-180/260
- Capsule Polishing and Sorting Machine PAP-150/300
- Capsule Sorter PAS-300
- Automatic Capsule Separating Machine PAS-300E
- Tablet Dust Catcher PAD-300A
- Blister Packet Opener PAO-400/400A
- Table top Counting Bottling Machine PAC-1000/2000
- Product Inspection Machine PAI-500
- Semi Automatic Piston Liquid Filler PAF-45

PPL-100T Vertical Sachet Packing Machine for Tablet

PFD Series Fluidized Bed Dryer

PPL-40A Counting and Packing Machine for Effervescent Tablets

PEM series 3-eccentricity Mixing Machine

PPM Series 3D Motion Mixing Machine for Powder

PWG Series Wet-process Granulator

PPL-120 Automatic Bottle Unscrambler

PBG Series High-efficiency Coating Machine

PTC-1000 Table Counting and Bottling Machine

PPL-880C Automatic Filling and Capping Machine

GMP Turn-Key Projects

Pharmaland offer Turn-key Projects from GMP Concept - Design to clean room/ plant building construction; from supplies of various dosage forms of processing equipments to installation and training operation; from QC analytical equipment supplies to implement of QA/SOP/GMP/ERP system.

Pharmaland has its Health Canada GMP model plant in Toronto for nutraceuticals manufacturer. Please visit www.pharmalandtech.com for more information.
